Sure, you should be able to open them from the attachment here. Let me know if you need anything else.

Can you email me the full reports with bar charts so I can see other factors besides demographic related info. I'm just guessing.....no confirmation.....we may be asked to print these for display at community meeting/open house. I suspect we'll be asked to display various maps, data, for the public to view while at the meeting space in addition to any presentation done. Thanks.

Subject: EJ Reports for Sterilizers over 100

Good morning,

I ran new EJScreen reports for all facilities involved in the outreach, and all but Lemco (Ardmore) had at least one indicator level > 80th percentile. I ran them at 1 and 2 miles as a starting point, and most of those indicators showed up

as close as 1 mile out. Midwest and Sterigenics (NM) did not have enough information to run a 1 mile report, so they were done only at 2 mi.

I'm attaching the reports, but I'm not sure how much detail you might be looking for? I'm working on a single spreadsheet with indicators for each facility for easy reference.
